TekMeter™

TekMeter™

Combining the capabilities of a powerful autoranging oscilloscope with the portability and versatility of a digital multimeter, the TekMeter tool automatically finds, measures and displays electrical and electronic signals. Three models provide the features that are right for you...including a backlit display. And a complete selection of probes and accessories will extend the versatility of this newest tool of the trades.

Digital Multimeters

Tek handheld digital multimeters will let you make fast, precise measurements with accuracies to 0.1%. A necessity for field service, on the bench top, or for appliance testing and repair, our DMMs can measure voltages to 750 VAC/1kVDC and current to 10 A. And a variety of features—such as autoranging, continuity check/beeper, data hold, overrange indication and rugged design—make Tektronix the preferred choice in DMMs for every application. Please reference the DMM capabilities chart on the following page for additional information.

Digital Storage Oscilloscopes

Only 4.4 lbs., battery operated and small enough to fit into your hand, our 220 series of handheld scopes pack a fistful of features. All deliver dual 10 MS/sec. sampling, auto setup, automatic measurements, and a sharp, bright display. And their Isolated Channel™ architecture ensures easy, safe floating measurements.

Service Assurance Advantages

- Service Assurance is priced well below the cost of even a single one-time service.
- Avoid the delay and inconvenience of arranging separate purchase authorizations for routine calibrations or an unexpected repair.
- Tektronix manpower and metrology expertise expand your internal resources.
- Plan your long term product support strategy.
- Eliminate unplanned expenses.
- Your requirements can be taken care of by Tektronix Service Centers nationwide.
- Our NIST Traceability, MIL-STD-45662A Compliance, and ISO9001 certification can help you meet your requirements.

Repair Protection

- Begins when your warranty ends.
- Provides up to three years of post-warranty repair protection.

Calibration Services

- Annual calibrations.
- Standards compliance and required audit documentation.
- Certificate of NIST traceability and MIL-STD-45662A compliance.
- Calibration seals.
- Maintenance of reverse traceability records.
- Coverage becomes effective upon registration.
- Up to five years of support.

U.S. Only Program

Thank You for selecting a TekTool from Tektronix!

Simply fill out this card to register your product, drop it in the mail and receive a free* TekTools™ cap. This will also put you on our mailing list for special offers and information about our newest products. To receive information on other TekTools products, please check the boxes below.
